Chapter 1

Drawing the Female Figure: The Basic Rules

The Three Basic Rules for Drawing the Female Figure

1. Avoid Straight Lines

The female figure is soft and supple. In order to express this quality, use rounded lines as much as possible.

2. Envision a Triangle

The female figure characteristically has a larger pelvis than the male figure. The hips should be drawn wide.

When blocking out your drawing, it's helpful to think of a triangle whose base is the width of the pelvis and whose apex is the top of the head.

Shoulder and Hip Width of the Male Figure

When drawing the male figure, the shoulders should be wider than the hips.

Even when a man has narrow shoulders, the hips should be drawn narrower than the shoulders.

When drawing a woman with broad shoulders . . .

A woman with wide shoulders becomes more feminine if drawn with her hip sticking out.

3. Envision a Figure Eight

The secret to drawing a shapely female figure is to give her a slender waist and broad hips. In essence, you want to think of a figure 8.

First draw the head.

1. It helps to draw a guide line down the center.

2. Draw a figure 8 for the body under the head.

3. Draw small circles where the arms and legs will be attached. These will become the joints.

4. Flesh out the waist and draw the arms and legs.

- You can vary the body type by drawing a tall and slender 8 or short and squat 8.
- The size of the circles drawn for the joints determines the thickness of the arms and legs.

The Human Body

The flesh is essentially clothing for the bones. Ask "What kind of clothes do I want these bones to wear?" You can create an endless variety of figures by changing how you "dress" the bones with flesh.

Wearing overcoat

In skirt and blouse

In undergarments

The human body is built upon a skeleton of bones, which are covered with muscle, fat, and skin. Bone structure and the flesh (muscle and fat) attached to it vary from person to person.

Nude

Transparent view

Skeleton

Characteristics of the Female Figure

The female figure is defined most prominently by the bust, the waist, and the hips.

Neck: A thick neck makes the figure look like a small child; for a grown woman, draw a long, slender neck.

Collarbone

Breasts: Shape, size, position, and preferences among breasts are as varied as their owners. See page 22.

Ribs: A lightly-drawn rib line gives the stomach and torso a trim look (but be careful: if the line is too heavy, it creates a gaunt look).

Hips: From the front, the widest part of the hips are determined by the bones.

Crotch: There is always a space between the thighs at the crotch even when standing with knees together.

The shoulder, upper arm, and armpit are crucial in showing maturity.

Immature figure: Even when the arms are lifted, a single line is adequate for showing the armpit.

Mature figure: The armpit must be drawn to show three-dimensional contours.

A child's shoulders are simply rounded.

The tapering of the ribs

The width of the pelvis

The difference between the tapering of the ribs and the width of the pelvis determines the size of the waist.

Note that the position of the waist is slightly different when viewed from the front and the side.

The line leading down to the navel expresses the subtle curve of the stomach and lower abdomen.

From the navel down to the crotch should appear as a gently rounded curve. You can achieve this impression from the front by applying screentones.

The position of the navel should be a little below the waist and one hand up from the crotch.

The curve of the crotch can be either flat or mounded.

Seeing the Body as a Wire Frame and with Contour Shadows

By getting a clear sense of the basic contours of the female figure, you will be able to create a more realistic and effective feeling of solidity

**Shadows Formed by the Body's Contours
When Illuminated**

Differentiating Body Types

If you understand how the differences in bone structure and body type affect their proportions, you'll be able to draw a wide variety of female figures

The Average Build

The Average Figure

- The stomach and lower abdomen are both slightly rounded
- The chest and body as a whole are curvaceous, and the torso is quite short
- The shoulders, arms, and legs are all somewhat fleshy; even when the legs and arms are long, they have a fullness to them
- The sides of the chest and hips form a shapely curve
- The hips are broad.

Slender Build

Athletic Build

The Slender Figure

- The neck is long and slim
- The shoulders are narrow, the chest is thin, and the waist is small.
- The torso is relatively long
- The arms and legs are long and thin, without excess muscles
- The sides of the chest and hips form a much gentler curve

The Athletic Figure

- A prominent breastbone
- Broad shoulders to house well-developed lungs
- Limbs are drawn more tapered at the elbows and knees, wrists and ankles (but be careful not to overdo it, or you will create a beefy look)
- Although the thighs are thick, the muscles taper at the knee creating the sharpest curve

Some Tips for Differentiating the Three Physical Types

The key points to note are:

1. The curve from the back to the hips
2. The line from the shoulder down the arm
3. The rib line below the breast
4. The thickness of the thighs

An athletic figure superimposed on an average figure

A slender figure superimposed on an average figure

Differences in Figure According to Age

Finger length represents one of the most prominent differences between the figures of adult and child. Also, for adolescent girls you can create a youthful appearance by drawing the body of an adult, but with more rounded lines overall.

An adult figure

An adult hand

Neck: Thick and relatively short

Shoulders: Rounded

Limbs: Even when long, not fully extended

Wrists & ankles relatively thick

An adolescent figure

An adolescent hand

Large head

Thick neck

Flat chest and hips

Barely tapered wrists and ankles

A child's figure

A child's hand

Some Rules of Thumb

	Adult	Adolescent	Child
Age range	18 and up	13 to 17	12 and under
Height by head size	7-8 heads or more	5-7 heads	5 heads or less
Curvature of body	Yes	Some	Almost none
Wrists & ankles	Slender	Average	Thick
Limbs	Long and fully extended	Not fully extended	Not fully extended
Drawing tips	Draw the head small, make wrists and ankles slim.	Draw the pelvis relatively thin; keep arms and legs relatively short	Draw head large, arms and legs are like sticks

Note. Women in the 18 to 19-year-old range will have elements of both the adult and adolescent figure

Differences of Face According to Age

To differentiate the faces of adults and children, pay attention to these two elements:

1. The distance between the eyes and the mouth
2. The bridge of the nose

Profiles in manga-style drawings

Adult

Profiles in illustrator-style drawings

Some Rules of Thumb

	Adult Features	Child Features
Distance between eyes and mouth	Far apart	Close together
Shape of face	Slightly longer	Round
Eyes	Small	Large
Bridge of nose	Draw clearly	Don't emphasize
Neck	Slender and long	Thick
Head	Small	Large

The Bridge of the Nose From an Angle

Drawing a distinct jaw line creates a grown-up effect

By adjusting the distance between eyes and mouth, you can differentiate between an adult and a child with or without the bridge line drawn in

What if you want to draw an older woman with a round face, or a child with a slightly longer face and pointy chin?

Answer 1 A grown woman with a round face

1. Keep the eyes small
2. Maintain distance between eyes and mouth

Answer 2

A child with a grown-up face.

- For a somewhat baby-faced look, make the eyes larger
- Round faces tend to look too large, so it helps to reduce the amount of hair

1. Draw large eyes
2. Tighten the distance between eyes and mouth
3. Minimize the nose
4. Make the head larger by giving more volume to the hair

- Smaller eyes always make the face look more grown-up
- It also helps to draw large ears and make the neck short and thick.

A Grown Woman with a Round Face

In order to make a woman with a round face large eyes, and big hair look more grown-up

1. Give her a long neck, and draw in the collarbone
2. Draw her figure to adult proportions

3. Broaden the shoulders and use other means to make the head look smaller

Chapter 2

Drawing the Female Figure: The Parts of the Body

True-to-Life vs. Manga

What to Exaggerate and What to Simplify

When using a photograph or other model for your drawing, exaggerate or simplify various aspects of the model to create a figure that suits your own taste

True-to-Life Figure

Tip #1: The distance from shoulder to breast

If you follow the model too closely, the breasts can seem oddly distant from the face. Unless you are striving for a realistic effect, position the breasts a little higher than they really are

Tip #2: Drawing the breasts

In real life, breasts seldom protrude beyond the torso lines unless they are very large. But to represent this accurately makes for an unappealing frontal view, so

Torso line

Extend curve of breast beyond line

Taper waist to inside of line

Short

Long

Tip #4: Knees

Keep the knees simple. A single arc is all it takes to create cute knees

Tip #3: The legs

In general, the thigh and the shin are roughly equal in length, but drawing the shin slightly longer makes a more attractive leg

Manga Figure

The Back

Tip #5: The neck

Draw the neck longer and slimmer than the model
At some angles a longer neck may look odd,
though, so care is needed

The contour of the back includes many bumps and dips, but normally only the following need be drawn:

1. Lines for the spine and shoulder blades
2. The buttocks

Back Tip #1: Creases

Many creases tend to form around the neck and shoulder blades as well as at the waist but you should omit most of them for a prettier back

Tip #6 Taper the waist sharply

The angle from armpit to waist will often leave the figure waistless if drawn realistically, so it almost always calls for exaggeration. Follow imaginary lines drawn from the armpits to the crotch

Tip #7. The position of the waist

For the cutest look place the waist about one breast-height below the breasts
A more realistic distance is about one head below the breasts

Tip #8: The distance from waist to crotch

The waist and crotch are normally about one head apart. If this distance is too short, the hips/pelvis will look too slight and the figure unbalanced

Back Tip #2: The buttocks

A simple standing pose cannot fully illustrate manga-style buttocks
See page 38

The Breasts

The Structure of the Breasts, and How They Attach

The breasts grow directly from the armpit line

There is a space between the breasts

The nipples turn outward

View from overhead

Spine

The breasts and nipples face outward at roughly a 90° angle to one another

In 3/4 view, one breast faces straight forward

Profile Views

Because breasts are soft and pliable, you can achieve very different effects by how you dress the figure

Bound tight with muslin

Enhanced

Clothing that accentuates size and shape

Bra-less

The Rib Cage and the Breasts

The breasts are made of fatty tissue resting atop the greater pectoral muscles of the chest

Differentiating the Size of the Breasts

Average size

This line is crucial for establishing the curvature of the breast, as well as a sense of solidity and weight, so it must be drawn with special care

Somewhat small

Somewhat large

Very large

The larger the breast the more it sags under its own weight

Adjust the size of the breasts in frontal view by raising or lowering the underside of the breast

The larger the breast, the more heavily the line under the breast should be drawn

Breasts of Different Shapes

In general, breasts fall into three basic shapes, but countless variations are possible among them.

Cup

Bell

Bowl

The Position of the Breasts

Breasts that are predominant among Westerners

The impression created varies greatly by how the breasts are positioned

Breasts that are predominant among Asians

Creating a Sense of Solidity

Apply shading with screentones to create a feeling of solidity

Scraping away some of the screen tones enhances the appearance of skin

When the figure is dressed you can create a more provocative sense of dimension with solid black fill and pen touch-ups

Solid black fill and pen work

With screentones added

The Breast from Diagonally Behind

Typically, this part of the breast is visible (though size is a factor)

Generally, the nipple is not visible in a 3/4 rear view, but it depends on the type of breast

The Nipple and the Areola

Since the areola is in effect a circle drawn on a sphere, it must be drawn with care in order to maintain proper perspective. When the areola will be toward the side, draw a circle on a ball first to see exactly what shape it needs to be on paper.

Some Examples

Pen work only

Pen work combined with screentones, handled with relative simplicity

Screentones only, without any pen work.

Combining pen work and layered screentones gives the drawing more dimension and makes the nipple and areola appear more real.

Showing Movement of the Breasts

The nipples are generally at the same height on both sides, so they provide useful reference points when blocking out your drawing or determining the position of the breasts

Movement is shown by changing the shape of the breasts and the position of the nipples

Bending Forward

View From Overhead

Remember that the nipples and areolas face upward

Even relatively small breasts naturally take on an attractive shape when the figure is bent forward

Average-sized breasts

The fuller the breasts, the more they droop from the pull of gravity

From On All Fours to Lying Face Down

Flat on the floor

The breasts press against the floor and are flattened by the weight of the body

The shape of the breasts is affected by how much weight is being placed on them (or not).

If the breasts are large, they take the shape of a flattened ball

How Moving the Shoulders and Arms Affects the Shape of the Breasts

When the arms are raised, the muscles in the chest are also pulled upwards, and the breasts change shape.

With arms raised, the chest thrusts forward

Subtle differences between when the arms are down and when they are raised can be seen clearly in side view

Drawing Slender Arms

When a figure is given broad shoulders, the arms also tend to grow thicker

To draw slender arms, tighten up the shoulder muscles and reduce the height between shoulder and armpit

When drawing a figure with raised arms, keep the upper torso relatively thin

A slender upper torso that gives a more muscular impression

The Shape of the Breasts When Lying Face Up

When a woman lies face up, her breasts naturally flatten under their own weight. You can show this effect by how you position the nipples.

The nipples still point outward, even when lying face up.

The line under the breasts gives shape to breasts seen from below.

Small breasts do not flatten as much, but you should still draw the nipples a little to the outside.

The flattened effect is shown by drawing the nipples farther apart.

The larger the breasts, the more unattractively they flatten out when lying in this position.

Large breasts

Petite breasts

Small but shapely breasts

Thickness of Upper Torso

Effects You Can Achieve With the Breasts

The Differences In Line

Both the angle and the pose emphasize the breasts. Special attention to the curves brings out the softness and fullness of the breasts

Thin, even-width lines

The heavier lines of a felt-tipped pen.

Covering or Holding a Breast

A small breast covered with a hand

A larger breast

Nipple peeking slightly through the fingers

A small breast held firmly

Flesh pressing between the fingers shows the fullness of the breast.

Shift the position of the nipple to show softness or forceful manipulation of the breast.

Squeezing the Breasts Together

Create ample cleavage by squeezing the breasts together with arms across the chest

The fullness of the breasts can be accentuated by drawing them close together.

If desired, the nipples may be shown peeking from beneath the arms.

If the breasts are squeezed in very tightly, the nipples need not be shown even with an extremely low-cut neckline like this.

Illustration

Working With Cleavage

Focusing only on the cleavage can produce lopsided results

When drawing a bust with cleavage, be sure to keep in mind the position of the breasts.

Normally, no cleavage shows even with relatively large breasts

The effect of using a push-up bra to deliberately accentuate cleavage.

1. Show the Natural Shape

Dress

Middy Blouse

2. Exaggerate and Highlight for Effect

Styles of Neckline

Y-cut dress

V-cut dress

U-cut dress

Bathing suit

Tank top

Halter top

Other Styles

A dress shirt squeezes breasts together.

Push-up bra

The Effects of Breast Position

Breasts that are wide apart

No cleavage even when pulled together with a bra.

Breasts that are close together

The slightest pull creates cleavage (though only if full-figured).

The Buttocks

The key to attractive buttocks is in how you draw the crevice. Think of it as an extension of the spine

Viewed from head on, the crevice of the buttocks is virtually a straight line

There is an opening between the thighs at the crotch.

Different Types of Buttocks

Firm, smooth, well-modulated curves make the best looking buttocks. Uneven curves create less appealing results.

Not sagging, but somewhat flat buttocks

Slightly sagging buttocks

Firm, well-rounded buttocks

Different Views of the Buttocks

Realistic buttocks

Naked buttocks are remarkably simple

Manga buttocks

"Covered" buttocks

Leather pants

T-thongs

Ordinary panties

Buttocks and Hearts

Buttocks are often said to resemble an upside down heart, as in this illustration

Buttocks actually look like this only when the figure is seated or viewed from above

The Contour of the Buttocks

How to Draw the Buttocks

The secret to drawing an attractive buttocks is in thinking of the crevice as an extension of the spine.

1. Sketch the basic outlines

2 Draw the legs. The buttocks do not really take shape yet.

3. Extend the line of the spine along the curve of the buttocks.

Why Getting the Crevice Right is So Vital

Knowing how to draw the crevice is important when drawing the buttocks in slacks or jeans as well.

The crevice follows along the line of the spine, and represents the center of the lower body.

4. Finished

The Buttocks from a Low Angle

Starting Framework for Pelvis

Center line
This becomes
the crevice

Oval that determines the
thickness of the legs

2 Draw the legs.

3. Remove the corners
and fill in the curves

When standing with legs apart

The Buttocks When Walking

With the left foot forward

With the legs together

With the right foot forward

Effects You Can Achieve with the Buttocks

Different Views

There are a fairly limited number of poses and angles that let you take advantage of the curvature and fullness of the buttocks.

Looking past the breasts to the hips

3/4 view, with hips thrust out

Lying face down

Viewed from the feet

View featuring the back

With upper torso lifted

Use underwear to accentuate the sense of reality.

Apply screentones to bring out the curvature and fleshiness.

Use angle and shading to draw the reader's interest.

The Crotch

Using Curved Lines to Show Dimension in the Crotch

1. Standing on Knees

The secret to drawing the lower abdomen and crotch lies in how you capture the gentle slope of the abdomen in the curved lines of the underpants

Front view from a slightly elevated angle

Drawing these lines straight will make it look more like a male crotch.

Front view from a slightly low angle

The lines in the underwear show the contours of the crotch.

2. Sitting on Knees

Formal

Side view. The crotch does not touch the floor

The buttocks are soft, so the heel digs in

Relaxed

When the legs turn outward, the buttocks are pulled apart and the crevice opens up

Wearing high-cut or string bikini-type underwear

View from below: the thighs and the buttocks press flat against the floor.

3. Squatting on Toes and Knees

4. Sitting on Buttocks, Part 1

Draw a line in the thigh here to show that the buttocks are thrust forward

Depending on what the figure is wearing and how it fits, the crevice of the buttocks may need to be shown

The curves of the seams show the differences in contour

A flat bottom reflects a hard floor

Ordinary panties
Note the difference in the curves

High-cut - type underwear

5. Sitting on Buttocks, Part 2

Even for essentially the same sitting position the appearance of the crotch will be different depending on whether the figure is leaning forward or back

Showing the thighbone

When leaning back with head behind hips and hands on the floor,

If you draw the crotch area in too much detail, the effect will be obscene

When leaning forward with head in front of hips

6. Falling Over Backwards

You can achieve the illusion of tumbling backwards by showing the full curve of the buttocks. This clearly distinguishes it from the crotch of a figure that is merely sitting with legs spread apart.

Falling with legs pressed together

An even harder fall
(such as when falling off of a bed)

You can create the impression of more dynamic movement by drawing muscle lines in the thighs.

For greater realism, leave a little space between the seam of the underwear and the crease of the thigh joint

The Lower Body in Action

Close-up of hip and thigh

Sketch in the invisible parts in order to get a better fix on the relationship between buttocks and thigh.

From a low angle

From an even lower angle and more to the front

When drawing a figure with a leg up in the air, give particular attention to the wrinkles in the underwear. Lines extending from the crevice in the buttocks and from the pubic mound give a feeling of realism

Front view

The Relation Between the Buttocks, Crotch, and Legs

When viewed from the side, this point is slightly off the floor

Drawing lines where the thighs enter the buttocks gives the buttocks a well-rounded look.

Face down

You can draw a line down the center for a crease in the underwear

The crucial lines
Without these lines,
the buttocks will appear flat

On a hard floor, there will be a gap between the waist and the floor.

The Legs

Drawing the Legs With an Understanding of Their Bone Structure

The bones

X-ray view

If you extend the thigh directly off of the buttocks, it will tend to be quite fat

When you want to draw a less beefy thigh draw the thigh first in the desired proportions and then adjust the buttocks as necessary for a natural fit.

A Side View of the Leg at the Hip

The thickness of the thigh where it attaches to the pelvis determines the shape of the buttocks

Thick thigh

Average thigh

Thin thigh

The Relation Between Pelvis and Legs

The bones

X-ray view

High-cut style underwear reveals the thigh joint

Buttock

Thigh

Interesting Characteristics of the Thighs

Even for legs that look skinny from the front, the thighs will look fat when viewed in different poses or from different angles.

Different Types of Legs

Thick-set from thigh to foot

Legs that are quite shapely in spite of thick-set thighs

Shapely, sexy legs

Drawing the calf with heavy lines creates a muscular look

Slender but pretty legs, with smooth curves

Skinny, shapeless legs

Sexy thighs

Excessively skinny thighs

The hips are wide and the legs are heavy-set as well

For shapelier legs, taper the lines running from shin and calf to ankle

The hips are wide but the legs are shapely

If the line tracing from hip to thigh curves too wide, the leg will look fat

A superimposed view

The hips and buttocks are small but the legs are heavy-set.

The hips and buttocks are small and the legs are slim

Examples of Pretty Legs

Side view of curvaceous leg

Focus on the Knees

Up-skirt Effect

Shadow cast on cylindrical object

The skirt's shadow enhances the sense of dimension and realism. The edge of the shadow should be curved to reflect the cylindrical nature of the thighs.

The Softness of the Buttocks and Legs

The buttocks and thighs are quite soft, and they change shape according to how weight is being placed on them as well as how hard or soft the underlying surface is

A hard floor

Sitting on the floor with legs extended forward

Pressure points where the body weight falls.

Supporting the body on hands and feet, with buttocks lifted off the floor

Pressure points where the body weight falls

Sitting on a Chair: How the Thighs Change Shape

Viewed from above

Sitting on a low chair
with legs apart

The same posture from
an elevated angle

Sitting with legs crossed

Sitting on a narrow beam or steel bar

Leaning back,
with knees relaxed

Sitting forward,
with knees together

Sitting on a sofa

The Neck

Connecting the Head to the Body

Looking Down From Above

The relative positions of head, neck and torso are easier to see if you draw them from an overhead perspective. Draw the figure in stages, adding one element at a time.

4. Finished.

3. Add the head.

2. Add the neck.

1. Draw the body

Showing the Neck and Nape of the Neck

Drawing Tips

1. Draw smooth lines where the neck meets the jaw and the shoulders.

2. Draw in the collar bone and lines showing the neck muscles.

The Bent Back

When You Can't Draw a Tapered Waist

When a woman bends forward with a rounded back, creases form across her stomach no matter how trim she might be

Structurally speaking, one side constricts while the other stretches

Bending Over in Other Ways

When knocked forcefully off one's feet

Depending on the posture and the angle,
the stomach creases may or may not show
To avoid the appearance of a fat belly,
keep the creases to a minimum in your drawing

The Effect of Underwear and Bathing Suits on the Female Figure

You can show the softness of the flesh in how it yields to the pressure of various items of clothing. In the case of underwear or bathing suits, it may be either the elastic along the edges or the fabric itself that presses into the skin.

The bra band under the arm

Panties press into the hips

Some kinds of fabric provide a glove-like fit that makes virtually no impression on the skin.

Other Examples

Some body suits alter the person's entire figure.

Natural figure

With body suit

Long tights pressing into thighs

A bathing suit that's one size too small

Water Droplets and Beads of Sweat

Always keep the contours of the body in mind when drawing droplets of water or sweat

1. Water flows along body contours.

Don't simply draw little round circles
Always remember that the beads of water or sweat lie on a curved surface

The flow of water or sweat should follow the body's curves

If you simply draw little round circles they will look like drops of water resting on a sheet of glass in front of the figure

2. Water obeys the rules of gravity.

Beads of water and sweat are drawn downward by the pull of gravity

3. Water Is affected by the direction of motion.

Beads of water and sweat are affected by the flow of air or the speed of an action as they flow along the contours of the body

The basic technique is essentially the same whether the figure is to be shown with a few beads of sweat, sweating profusely, or drenched with water

Degrees of Wetness

Covered with sweat

Drenched

Heavy sweat flying in every direction

Wire Frames

Getting a Grasp of the Body's Curves

From Low Angle

From High Angle

Using Wire Frames

Undergarments and clothing of all kinds generally conform to the contours of the body. Wire frames are especially helpful when drawing the ovoid curves at the neckline, the cuff of a sleeve, or the hem of a skirt

The basic shape of a T-shirt and skirt

Clothing is in essence a figure's second skin

1. Drawing clothing

When drawing a V-neck, use the vertical lines for reference

2. Drawing a figure in water

The surface of the water should follow the curves of the body

3. Drawing logos

Refer to the wire frame when drawing logos and other designs on the clothing

4. Drawing underpants

Following this line will give you high-cut panties

Choosing a lower line gives a more ordinary cut

5. Drawing skirts

Refer to the wire frame to figure out the curve of the skirt as seen from below

Draw the desired clothing over the frame to find the appropriate curve.

Finished

Wire frame of the desired angle

The frame also shows the curve of the socks.

What if you want to draw a female figure without drawing attention to the bust or hips?

Answer 1

1. Draw a long, slender neck
2. Even if you don't draw breasts or hips, do taper the waist to give the figure a certain amount of contour
3. Give the figure narrow shoulders
4. Make the head relatively small, and draw a body about 7 to 9 heads high

Answer 2

Draw the figure as slim and delicate. In this case, the shoulders can still be somewhat broad.

Answer 3

Draw a clear collarbone

A boyish girl

When drawing children, there is almost no difference between male and female figures

Answer 4

1. Use facial features, hair style, or clothing fashions to distinguish grown women and little girls
2. Draw straight, skinny legs

Chapter 3

Drawing the Female Figure: Using Detail for Effect

Different Types of Nails

Uncanny fingernails

Trimmed fingernails

Elliptical fingernails

Rounded fingernails

Examples of Hands and Nails

Showing Manicured Nails

Spotted black

Spotted black with white
for reflected light

Variously shaded
with screentones

Using screentones to represent different colors

Blue

Red

Customarily, red and green nails are spotted black or represented with a graduated screentone, light pink and yellow nails are represented with a light screentone in the #10 to #19 range, while blue nails are represented with a #42 or #52 screentone

Toenails

Pen-Drawn Shading

To apply shading with a pen, draw thin lines

Shading in Three Easy Steps

1. Apply the desired screentone

2. Determine where light should strike and scrape off the shading.

3. Cut away the excess.

Finished

Applying Shading with Screentones

The Mouth and Lips

The Shape of the Lips

You can achieve many different effects with the mouth according to what aspect you choose to highlight

Special Effects

When seeking a particular effect with the mouth, focus attention on it by cropping the frame to exclude the eyes.

Effects You Can Achieve with Black and Shading

Accenting the outline

Solid black plus hatching

Solid black plus screentones

The Ears and Earrings

Since earrings are small, they are almost always drawn to obtain a very particular effect. It's important to think carefully about what view of the ear will offer the desired effect

Some Tips on Ears and Earrings

The top of the ear is on the same level as the eyebrows, and the bottom of the ear is level with the base of the nose

When viewing the side of the head, the ear is at the center

An ear with a pierced earring at different angles

The Hair

Hair styles are determined primarily by two characteristics: how stiff the hair is, and how much of it there is

The Difference Between Coarse Hair and Fine Hair

If the hair is fine and soft, it tends to lie flat against the scalp.

Fine hair

If the hair is coarse and stiff, it tends to grow outward from the scalp

Underpants: The Different Look of Different Fabrics

When not being worn

Silk

Light weight puckering fabric

Standard weight cotton-synthetic mix

Silk

- Hugs body curves faithfully
- Wrinkles appear as very delicate lines.

Light weight puckering fabric

- Draw wrinkles along the top and bottom hems
- A few wrinkles follow the contours at the crotch and hips.

Standard weight cotton-synthetic mix

- Draw only the outline and seams of the panties.
- A plain look, with the feeling that the panties hug the contours of the body

What are the secrets to drawing faces in profile?

Answer

Based strictly on bone structure it is strange for the eyes to be set too far back from the nose, but in drawings, such a style may still be perfectly acceptable. There are many different ways in which the eyes, nose, and mouth can be distorted or exaggerated to good effect, so you can develop your own style without being too worried about actual bone structure.

In Egyptian drawing style the face is presented in profile, but the eye gazes straight out at the viewer.

Outline of the head even the mouth protrudes quite a bit.

Bone structure the face is nearly flat.

Realistic

Illustration

The Female Figure Goes to School

1. Getting Dressed: The Blouse

Use screentones to draw bra showing through blouse

Wrinkles in the blouse should be drawn with sharp, dynamic lines

The bust with different blouses

Fastening the bra

2. Getting Dressed: Shoes and Socks

When the figure is seated, the surface of the bed or cushion conforms to the shape of the buttocks

How the invisible part of the buttocks presses into the mattress or cushion

Some loose socks

Slipping into her shoe in a seated position.

3. Getting Dressed: In Front of the Mirror

Even when the character is simply standing or sitting straight avoid making the figure completely rigid

Supple figure, standing Rigid figure, standing

Supple figure, seated Rigid figure, seated

Lips and lipstick

4. Running Down the Hallway

The thigh of a running figure.
You can achieve the impression
of dynamic motion by showing
the ripple of the muscles

In real life, the rear flap of
the collar does not actually
lift up so high

A sudden stop
momentum makes her skirt fly up.

5. Sitting on a Chair

The chest may be drawn in some detail at the neck line

6. Jumping up in Joy: In School Uniform

A line for the stomach muscles

Since middy blouses are relatively short, stretching tends to bare the midriff

For shading, apply screentones with attention to the contours of the body

Leaping with Both Arms in the Air

Going for effect

Actual

7. In the Locker Room

Bunched up gym clothes should be drawn with soft, gentle lines to reflect the softness of the fabric

Bra straps are usually made of sturdy material

Use sharp but relatively few lines to draw wrinkles in the gym trunks
Loose socks should appear soft;
how you draw the wrinkles depends
on the kind of fabric

8. Dressed for Gym Class

With jersey hanging loose

With jersey tucked-in

There are two basic types of gym trunks—with long and short seams

The tucked-in jersey actually bunches up under the trunks, but it looks better not to draw this too realistically.

9. More Tips for Drawing Gym Clothes

The jersey is smooth, but also has a certain weight. A series of wrinkles cascading from the breast line shows the thrust of the bust

Wrinkles on the back typically appear around the shoulder blades and the waist

The lower abdomen
You can use black and graduated screentones to achieve a sense of dimension

Black, with the lines of the buttocks shown in white
The way the buttocks appear to bulge out beneath the seams creates a realistic effect

It is best not to draw too many wrinkles in the crotch

Using transfer screens to show reflected light can give the buttocks of the trunks a feeling of volume

10. Regulation Bathing Suits

Drawing all the seams makes the bathing suit look more realistic. Seams are normally found on the shoulder straps, along the sides, and across the crotch

Tight wrinkles penned in along the side seams bring out the curvature of the body

Use black and screen tones to create the impression of a wet bathing suit reflecting light

11. Riding a Bicycle

The seat from behind

Female riders normally sit on their skirts, so a skirt that flutters behind in the wind is a fictitious manga effect

The top of the seat is higher than the bottom of the thigh

The skirt curves according to the position and roundness of the thighs

12. On the Way Home: Walking Outdoors

Distinctions should be made between summer and winter uniforms. The summer fabric is light and shows more wrinkles, while the winter blouse should be drawn without many wrinkles

In a gentle wind

Winter uniform
the wind lifts the garments as a whole
instead of merely wrinkling them in spots

Summer uniform
the wind creates localized wrinkles

When showing a strong gust, summer and winter uniforms should both be drawn flapping in the wind.

When a skirt gets blown up in the wind, the arc of the hem shows the weight of the fabric.

Chapter 4

Learn from the Pros

Girl in Middy Uniform

Drawn by Masaru Kaku

Adding some black accents when drawing the pleats brings a feeling of dynamic dimension to a skirt that would otherwise appear flat and dull

Line drawing

Narrow Shoulders for a Youthful Effect

- ◆ Narrow shoulders and a trim figure offer the image of a cute young teenager. Since narrow shoulders make the head look larger, it typically leads to a childish look. But give her some curves and long, shapely legs, and she becomes a vivacious teenager.
- ◆ A waist narrower than her shoulders and the lines that show her breasts swelling against her blouse let us see her shapely figure even through her clothes. Also, the lines of her thighs suggest the well-rounded buttocks from which they grow.

Beauty with Bouquet

Drawn by Jun Matsubara

Curled hair is a hallmark of girls comics (shojo manga). Here, a dozen or so lines twist together to form each tress, and you can see how the delicately curving lines and the varying widths of white space between them combine to give the curls a remarkable feeling of volume

Rough sketch

Preserve Your Original Conception through Attention to Detail

- ◆ Start by blocking out the overall image, and then work up a complete rough sketch. If you go ahead and rough in the flowers and other accessories at this stage, you should be able to proceed with confidence and finish with a drawing that remains quite faithful to your original conception
- ◆ When you pick up your pen to complete a rough sketch like this, you must have a clear vision of the final drawing you wish to create, and your pen must be controlled by a very precise sense of where each line must go.

Alluring Adult

Drawn by Yasuo Matsumoto

Draw the lines showing the swelling of the breasts sharp, thin, and smoothly in order to bring out the natural softness and vitality of the flesh

Rough sketch

Achieving a Natural Balance

- ◆ When deciding on the figure's composition and overall proportions, use your guide lines to maintain the proper balance. Focusing too much on the proportions can often result in a lifeless figure, but the drawing will come alive like this so long as you develop the composition with a clear visual image.

Dream Fantasy

Drawn by Morio Harada

The lock of hair sweeping forward from in front of the ear subtly suggests the feminine shoulder line. Some may even visualize the line of a rising bust. Even something as simple as a strand or two of hair can trick the eye to create startling effects.

Line drawing

Your Most Cherished Dreams are the Soul of Manga

- ◆ Even in this simple line drawing, the artist has meticulously detailed the lace at the sleeve and around the hem. But the drawing takes on a whole new vibrancy with the addition of a black bodice and an elegant skirt border created with screentones. The black ribbon at the ankle provides another elegant accent
- ◆ The finished drawing seems too real to be a dream, yet too imaginary to be real, and perhaps in that we can see the very essence of manga

Girl Athlete

Drawn by Bancho Hoshino

From the very beginning, the artist was preparing the way for black hair with white highlighting to show the reflecting light. Such efficiencies are the mark of a true professional.

Line drawing

A Medley of Cheerful Faces for a Drawing Bursting with Fun

- ◆ It takes time to draw an initial sketch that is close to finished quality but the advantage is that it simplifies your final pen work. When the pen work can move swiftly, it energizes the characters and lends spontaneity to their expressions.
- ◆ A template was used to draw the circle for the ball, and careful attention to details such as shoe strings and soles, even with simplification, helps give the drawing a feeling of balance.

Sexy Babe

Drawn by Ganma Suzuki

The line of the fabric hugs the skin as if painted on, but the impression of a garment against the skin is created by the slight inflections in line where seam meets body. Varying the weight of the line brings out the softness of her fully-developed body.

Line drawing

Exaggerate Boldly

- ◆ Draw the figure with large breasts and buttocks to create a well-endowed woman full of vim and vigor. The eye-popping voluptuousness of the body is counterbalanced by a cute, slender neck and a slightly longer than normal torso, and the serene expression on her face adds to an impression of freshness and inviting softness. In poses that feature the buttocks, it's often easy to get excessively caught up in the shape of the two cheeks, but always keep in mind as you draw that the buttocks are where the legs grow from.

Humorous Illustration

Drawn by Shoko Ando

Even lines that look simple and artless can show movement and space. Draw as if you have become the object you are drawing, rather than as a person looking at it from the outside

Rough sketch

Simplified Features, but Drawn with Warmth

- ◆ The facial features have been simplified to an extreme, and the body is distinctly stylized. But by applying the same style to each character, a certain feeling of rhythm is born between them. The unadorned dots and lines actually reveal a remarkable amount of expression. When drawn with a clear image and distinct sense of mood, even the simplest figures can be filled with heart.

Coquettish Maiden

Drawing by Yu Manabe

The subtle structural detail seen in the relationship of the shoulder strap to the curve of the breast is one of the secrets of making the figure seem more real and tangible. Such effective use of detail can only come from one's native artistic sense

Rough sketch

For Proper Balance and Structure, Sketch Even What Won't Show

- By choosing a pose that provides a feeling of depth all by itself, you can create a powerful illusion of physical presence even in a standalone figure without any background. The secret to getting the right balance in this figure lies in including details of the loin area in the rough sketch, even though that part is slated to be spotted in black.
- ◆ The logo on the shorts provides an important accent. It may seem like a trivial thing, but drawing the logo neatly and sharply contributes to a feeling of tautness, and intensifies the feeling of physical presence.

Glamorous Beauty

Drawing by Noriyoshi Inoue

Avoid wasting time on small things. Once the pen work begins, the neck is left clean where the necklace is slated to go.

Rough sketch

Pursue Your Own Ideal of Beauty-Without Compromise

- ◆ On the way to a finished drawing, you have only so much time to decide on the composition, facial expression, accessories, and any special motifs you wish to include. In this case, the hand drawn so prominently in the rough sketch ultimately got removed. Since a significant amount of effort goes into even a rough sketch, the natural tendency would be to keep the hand even in the final pen work, but there is a valuable lesson in this example. In order to achieve the best possible rendering of your vision, you must sometimes be willing to change course, even if it means additional work. It is the refusal ever to compromise your vision that will ultimately bear the finest results.
